RM23A

Designed based on Clean&Cute concept, RM23A controller offer a luxurious hand-held feeling. Combining the best ergonomics and user research data, it brings together the most friendly pictograms and optimized control logic experience, now better than ever.

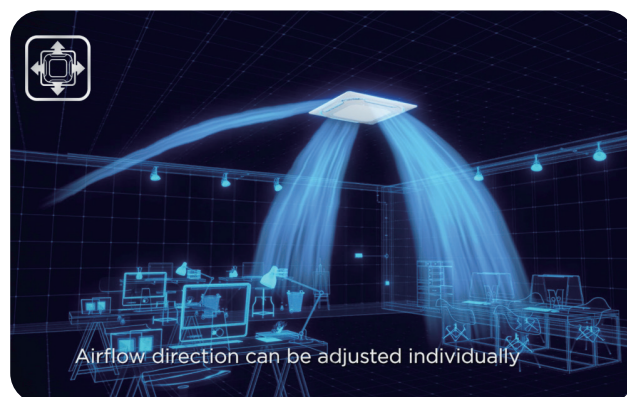

V8 advanced functions

· **Turbo:** For space fast cooling or Heating.

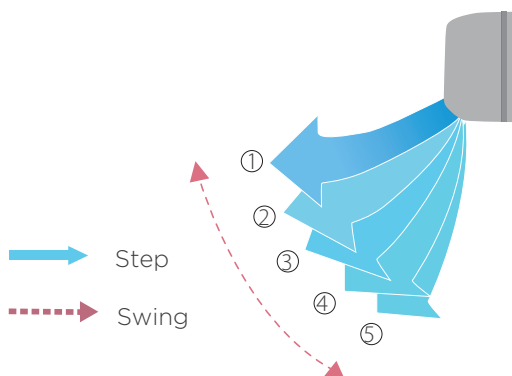

· **Louver individually control:** Realize personalized air flow demand control.

Airflow direction can be adjusted individually

· **5 Louver Swing Angles:** 5 swing angle settings allow precise control of airflow direction to suit various room conditions.

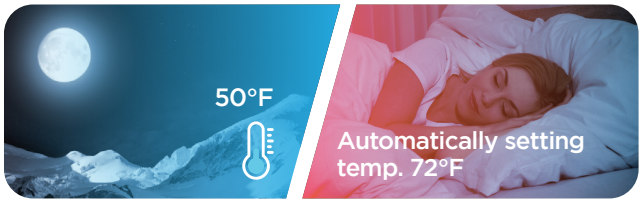

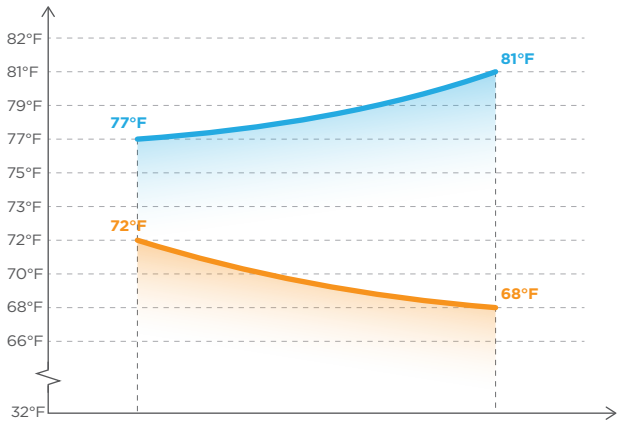

· **Midea ETA:** Will help you further save energy on air conditioning.

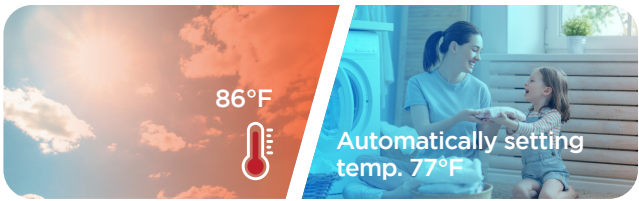

Meticulous sleep care

- G-sensor detect your motivation and light the screen when RM23A is picked up and the differentiated button size and protrusion design help you quickly complete simple control operations in the dark.
- Sleep function: Pre-set scientific sleep temperature curve providing temperature care for sleep, and can also be personalized according to your preferences.
- IDU display off function allow to turn off even the the small display light on IDU panel to create a completely dark relaxing environment.

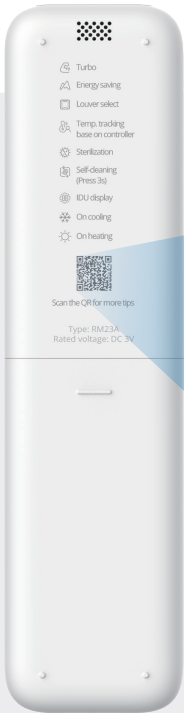

Temperature above is for reference.
